Letter of Intent

To Whom It May Concern:

The intent of this submittal package is to submit an NOI for General Permit # 20-CP for the construction activities at the existing USPS facility on 21 Magothy Bridge Road, Severna Park, MD 21146. Included in this submittal package:

- Approved Erosion and Sediment Control Plans
- Vicinity Map
- Stormwater Pollution Prevention Plans

It should be noted that these plans were submitted to Anne Arundel County Inspections and Permits and the Anne Arundel County Soil Conservation District to obtain a grading permit. After the review was completed, it was found that a grading permit was not needed because USPS is a federal entity. However, E&SC plans were approved by Kevin Holland at the AASCD. The proposed work to be performed at the USPS facility is for the purpose of upgrading the site to accommodate a new fleet of electric vehicles. The work includes, but is not limited to, reconfiguring the parking layout, asphalt pavement, new sidewalks, two retaining walls, ADA improvements, EV charging posts, a new stormwater management system, and retrofitting the interior with various features.

Thank you for taking the time to review this submittal package. Please let me know if any more information is required.

Sincerely,

GPD Group
