# Maryland Bulk Data Delivery User Guide

## Introduction

In March 2012, the Maryland Department of Transportation Maryland Motor Vehicle Administration (MDOT MVA) partnered with NIC Maryland through a Master Contract with the Department of Information Technology to provide Bulk Driving and Vehicle access service. This document provides an overview on implementing and interfacing with this service. In order to utilize the service, the customer must be authorized within the scope of the Driver Privacy Protection Act (DPPA) and have a subscription to the Bulk Data Delivery service to access MDOT MVA records.

## Bulk Data Delivery Service Overview

The Bulk Data Delivery service is a secure file transfer batch-based system which allows customers to receive larger volumes of MVA driver or vehicle record data.

### Maintenance Windows

This service is unavailable to process requests during server downtimes. Current NIC Maryland scheduled downtimes are:

- Second Saturday of every month from 11:00pm until 5:00am EST

### New Titles, Registrations and Address Corrections and Registration Renewals:

Customer receiving the New Titles, Registrations and Address Corrections (VORS580) and Registration Renewals (VORS590) will receive the files weekly between 01:00 and 01:30 AM Sunday morning.

Upon subscription to the Bulk Data Delivery service, each customer is assigned a directory to which data can be transmitted and retrieved. The MVA will return the output files in in the customer's "out" directory.

### **Special Request Programs**

Customers subscribing to Special Request Programs (VORS023 and VORS024) will place an input file to the FTP location indicating the records being requested. Each second Sunday of the month, between 3:30 and 4:30 PM, customers will receive their results file.

Upon subscription to the Bulk Data Delivery service, each customer is assigned a directory to which data can be transmitted and retrieved. Special Request Program customers will provide to NIC Maryland, via the Service's "in" directory, a listing of the records they are requesting. The customer must have a DPPA-approved reason to request each record. NIC Maryland will submit the request to the MVA mainframe. The MVA, upon receipt of an input file, will return the resulting output files in in the "out" directory.

All files placed on the FTP server will cause a confirmation e-mail to be sent to the customer as soon as the file has been picked up by the Bulk File Delivery service.

The file server location for the all Bulk Data files are located at the following URL:

<https://sftp.egov.maryland.gov>

Incoming files for all file types will generate a "received" e-mail confirmation. **The file format and file naming convention and file layout will be exactly the same as what customers are currently getting from MVA.**

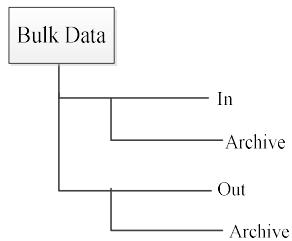

## **Program Guidelines**

### **FTP Directory Structure**

Each customer is assigned a directory to which data can be transmitted (where applicable) and retrieved. When the customer logs onto the server, the server will automatically route the user to the proper directory according to the User ID & Password used to login. Upon login to the file transfer server, the customer will be rooted into a directory named for their billing identification code.

Under this directory will be service directories for bulk services. Within the service directories will be "in" and "out" directories as well as archive directories to hold files from previous processing days. The "in" folder is used to transmit request files to the service and the "out" directory is used to receive response files.

Example:

NIC Maryland will archive the input and output files prior to dropping the new files in the Out folder.

## **Charges and Billing**

Each record returned by the MDOT MVA will bear a cost of \$0.06/record for non-Government entities and \$0.025 for Government agencies. There are no minimum fees.

Invoices are generated and mailed to customers at the beginning of each month for the previous month's transactions. Payment is due upon receipt of the monthly invoice. Interruption to service occurs if payment is not received by NIC Maryland within 20 days of the date of the invoice. If payment is received following a termination, NIC Maryland determines eligibility for reinstatement.

## **Bulk Data Access Program Support**

To report a technical problem, error message, or billing inquiries, please call the NIC Maryland Help Desk at (888) 9MD-EGOV and explain the nature of the problem. The support staff will request information from you and will work with you to resolve the issue.

## **Discontinuing Participation in the Bulk Vehicle Record Data Program**

Customers who no longer wish to participate in the Bulk Data Access program must notify NIC Maryland, in writing, of their intentions to discontinue participation. The contract may be discontinued by either party with a thirty (30) day notice in writing.

## **Secure FTP Connections**

The server allows customers to download and upload files via a secure connection. Data being transferred is encrypted from point-to-point. Users are required to use an SSL connection via either their browser or secure FTP (sFTP) via a 128-bit FTP client.

Customers have two (2) options for connecting to the NIC Maryland S/FTP server. Following are the choices available and the information needed to utilize each.

### **SFTP Connection**

Customers may submit and retrieve files via a secure file transfer client. If using a secure file transfer client, access to the server is accomplished by accessing the following server name:

**sftp.egov.maryland.gov**

A connection will need to be made using valid user credentials. The client must be able to handle at least 128-bit encryption. Secure file transfers occur over TCP port 22.

## HTTPS Connection

The HTTP/S web client capability allows any user with access to a common web browser to easily connect to the server to upload and download files. Clients may connect to <https://sftp.egov.maryland.gov> to submit and retrieve files. Data transfers will be SSL encrypted and RFC-2228 compliant. HTTPS occurs over TCP port 443.

\*Note: Customers are NOT required to purchase their own certificates. Certificates are sent from the server to the client.

## Connecting to the NIC Maryland Secure Server via HTTPS

### Accessing NIC Maryland's Secure FTP Server

1. Start your Internet browser.
2. In the address field, type in <https://sftp.egov.maryland.gov/>.
3. Enter your Username and Password assigned by NIC Maryland and click on the “Login” button.

The screenshot shows a web browser window titled "Secure Client Access". At the top left is the NIC logo with the tagline "the people behind eGovernment". To the right are links for "Home" and "Instructions". Below the header, a yellow bar contains a lock icon and the text "Client Login". On the right side of the yellow bar, it says "Not currently logged in". The main content area has a light gray background and features a "Client Login" form. The form includes fields for "Username" and "Password", both represented by input boxes. At the bottom of the form are two buttons: "Request a New Account" and "Login".

4. You are now connected to the NIC Maryland Secure FTP server.
5. To close your session, click the “Logout” hyperlink at the top, right-hand portion of the screen.

### Transferring a file to the NIC FTP Server

To transfer a file to NIC Maryland's Secure FTP Server, click on the “BulkData” folder.

The screenshot shows the NIC File Manager interface. At the top, there are navigation links: Home, Account, Share, and Logout. Below the header is a toolbar with buttons for Refresh, Check All, Delete, Rename, New Folder, Zip, and Unzip. A search bar labeled 'Search:' is also present. The main area displays a table of file entries. One entry, 'BulkData', is highlighted with a red oval. The table columns include Name, Type, Size, and Date. At the bottom of the table, it says 'Showing 1 to 1 of 1 entries'.

Next, click on the “in” folder. This links to your “in” FTP directory.

This screenshot shows the contents of the 'BulkData' folder. The 'In' folder is highlighted with a red oval. The table columns are Name, Type, Size, and Date. The 'In' folder was created on 2013-12-15 04:07:28. Other entries in the table are 'Up' (type up) and 'out' (type folder).

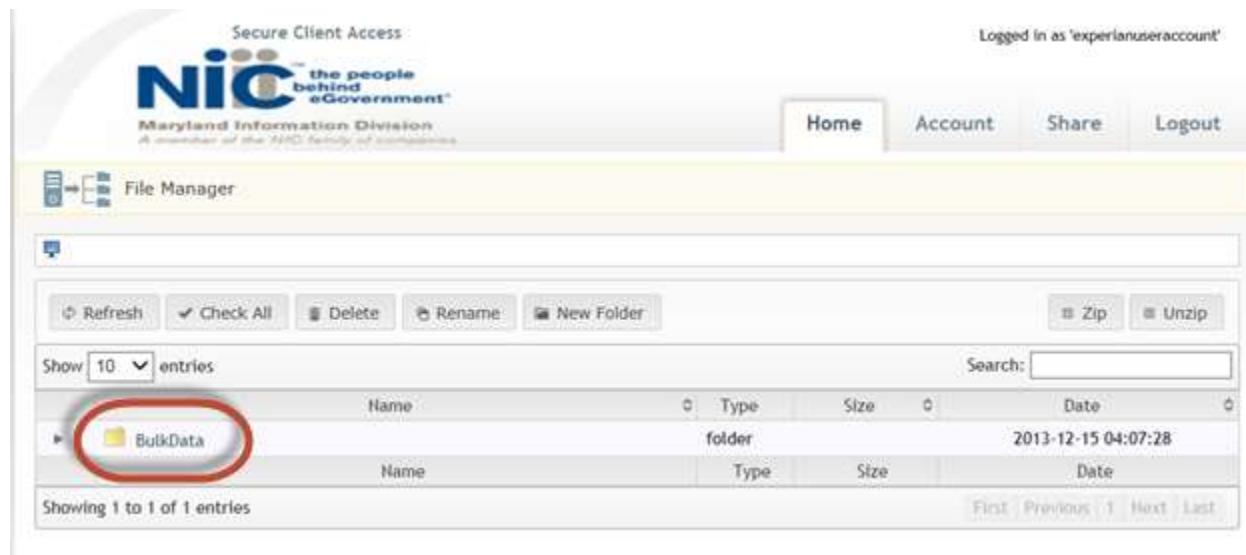

Click on the “Add files...” button located at the bottom side of your browser.

The screenshot shows a file upload interface. At the top, there are buttons for '+ Add files...', 'Start upload', 'Cancel upload', 'Clear', and a checkbox. Below these is a progress bar for 'Test.pdf' which is 81.76 KB. Underneath the progress bar are 'Start' and 'Cancel' buttons. At the bottom, there is a 'File Upload' button and a note about supported browsers: 'Upload Drag & Drop supported on '.

Navigate to the file you wish to upload into your “in” folder. Double-click the file the select the “Start upload” button to initiate the upload process.

## **Retrieving a file to the NIC FTP Server**

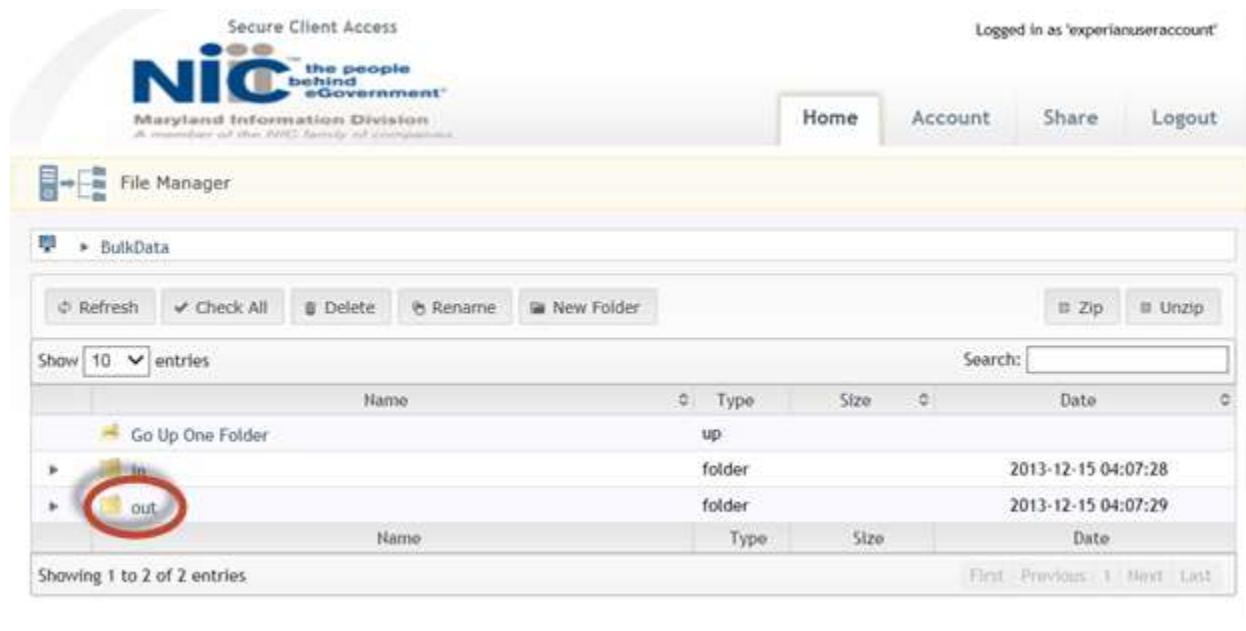

To retrieve a file from NIC Maryland's Secure FTP Server, click on the "BulkData" folder.

The screenshot shows the NIC File Manager interface. At the top, there is a header with the NIC logo, the text "Secure Client Access", and "Logged in as 'experianuseraccount'". Below the header is a navigation bar with links for "Home", "Account", "Share", and "Logout". The main area is titled "File Manager" and contains a file list. The first item in the list is a folder named "BulkData", which is circled in red. Below the list, it says "Showing 1 to 1 of 1 entries".

Name	Type	Size	Date
BulkData	folder	0	2013-12-15 04:07:28

Next, click on the "out" folder. This links to your "out" FTP directory.

The screenshot shows the NIC File Manager interface, similar to the previous one but with a different path. The header and navigation bar are identical. The main area shows the contents of the "BulkData" folder. Inside "BulkData", there are two folders: "up" and "out", with "out" being circled in red. Below the list, it says "Showing 1 to 2 of 2 entries".

Name	Type	Size	Date
up	up	0	
out	folder	0	2013-12-15 04:07:29

The screen below displaying the returned file will appear. Click on the file name link to download the file. Then follow the on-screen instructions to open or save the file. (Please note that although you may right click on the file and choose the "Save As" option to download the file, the method specified here is the preferred one and will ensure the integrity of the file layout.)

## BULK Code References

### Vehicle Record Type Codes

MVA Vehicle Record Type Codes are described in the table below:

Vehicle Record Type Code	Description
1	Regular license plate
2	Dealer license plate
3	Cross-referenced license plate (License plate is cross referenced to another license plate number)
4	Returned license plate
5	N/A (Not applicable or used at this time)
9	No match

### Vehicle Brand Codes

The BULK system translates the various brand fields in the database when vehicle titles or salvage certificates are generated. In some cases, there may be different interpretations, depending on whether a salvage certificate or a title certificate is generated, which is indicated in the tables below. The brand fields are input by hand and are not edited; therefore, the descriptions may vary. Information will be displayed "as is" if it does not match the predefined set of brand "codes" listed in the chart.

Odometer Code	Description
A	Actual mileage
B	Exceeds mechanical limits
C	Not actual mileage
D	Exempt
