Driver Record Monitoring (DBM) User Interface Guide

Introduction

The Driver Batch Monitoring (DBM) service, facilitated by Tyler Maryland, provides methods to securely monitor and receive driver record updates for a list of monitored drivers from the Maryland Department of Transportation Maryland Motor Vehicle Administration (MDOT MVA). Tyler Maryland has developed a User Interface to offer a more user-friendly and intuitive method of interacting with the functions and records for driver monitoring.

To be approved to use this service, users must be authorized within the scope of the Federal Driver Privacy Protection Act (DPPA) and approved by the MDOT MVA. Approved customers can enroll and manage a list of drivers to be monitored and receive updates when violation information changes for a monitored driver.

Changes in this document:

- Addition of Conviction Category – page 33
- Addition of Conviction Details – page 34

Application Overview

The Driver Batch Monitoring (DBM) User Interface provides a secure method of exchanging requests and data related to driver monitoring. This application permits customers to perform the following through a secure interface:

- Submit Add, delete, or edit monitored drivers.
- Receive annual driver records and driver record updates, alerts, and errors.

Each night, the system inspects the monitored drivers and provides results back to the customer containing either updated records for the monitored driver records or the complete record, depending on preferences established during enrollment. The results files are sent daily, weekly, or monthly, depending on customer preferences established during enrollment.

Customers can submit an “Add/Change/Delete” request on weekdays. Customer IDs (Driver’s License Numbers, Maryland ID and/or FEIN) submitted with an “Add” indicator will return a complete driving record that will be produced overnight. Customer IDs submitted with a “Delete” indicator will be removed from monitoring for that customer.

Note: Subscribers who have already established Customer IDs for monitoring through the MDOT MVA will not need to resubmit the Customer IDs.

New Customer IDs added by a customer will be matched against the MDOT MVA’s records based on two key fields: Customer ID and Date of Birth. Records that do not match these keys will be rejected and the customer will receive an error response for that Customer ID.

Drivers will be processed Monday through Friday, nightly between the hours of 6:00 PM ET and 6:00 AM ET. Any actions sent after 6:00 PM ET will be processed the following business day. As with the existing MDOT MVA system, this system may be unavailable to process search requests during maintenance windows.

Maintenance Windows

Current maintenance windows where the application may not be available include:

- Nightly: 12:00am – 12:30 AM EST
- Sunday: 6:00am – 11:00 AM EST
- The second Saturday of every month from 11:00pm until 5:00 AM EST
- Tuesday and Thursday 5:00 PM EST

Program Guidelines

Driver Monitoring Submissions

DBM Add/Change/Delete request submissions must occur no later than 5:00 P.M. EST any Monday – Friday, excluding Federal and State holidays. Return records will be available via the interface Monday through Friday after 7:00am ET. Only Maryland issued Customer IDs may be accessed via this application.

Violation Codes

Violation codes included in the DBM program are related to suspensions, withdrawals, cancellations, revocations, restrictions and moving violations.

In the event MVA creates, deletes, or modifies a violation code, updated records will be produced. If a subscriber has opted to receive 3-year/complete records, ALL driving record entries (within the rolling 3- year time span (or complete, if applicable)) will appear in the resulting record regardless of whether the violation codes are included in the DBM monitoring program or not. If a subscriber opts to receive partial record updates (a.k.a. driving-record entry updates), only those entries attached to a violation code included in the DBM program will be sent to the customer.

Charges and Billing

A 36-month (3-year) driving record, a complete driving record, and a Probation Before Judgment (PBJ) record produced via DBM are each considered non-certified copies and for non-government entities, and, as such, bear a cost of \$12.00/record. A driving record entry update or a PBJ record entry update is considered a partial record update and is priced accordingly at \$0.08/record. There are no minimum fees. Invoices are generated and mailed/e-mailed to customers at the beginning of each month for the previous month's transactions. Payment is due upon receipt of the monthly invoice. Interruption to service occurs if payment is not received by Tyler within 20 days of the date of the invoice. If payment is received following a termination, Tyler Maryland determines eligibility for reinstatement.

Anniversary Date for Monitored Drivers

When a new Customer ID is added to the monitoring program, the Customer ID enrollment date is considered the anniversary date for that monitored driver.

Upon receipt of a new Customer ID submitted for monitoring, the system will return a complete driving record. Subsequently, on the enrollment anniversary date of each Customer ID, the Customer ID(s) being monitored will cause the generation of a complete driving record.

DBM Program Support

To report a technical problem, error message, or billing inquiries, please call the Tyler Maryland Help Desk at (888) 4MD-HELP, 410-990-1090 or mdhelp@tylertech.com and explain the nature of the problem. The support staff will request information from you and will work with you to resolve the issue.

Discontinuing Participation in the DBM Program

Customers who no longer wish to participate in the DBM program must notify Tyler Maryland, in writing, of their intentions to discontinue participation. Notification must be sent from the primary contact on the account. The contract may be discontinued by either party with a thirty (30) day notice in writing.

Getting Started

Establishing an account

To register for an account to utilize the service, go to <https://egov.maryland.gov/register/> and complete the account registration process. Once the account is approved by the MDOT MVA and the account credentials are established, you may login to the Driver Batch Monitoring User Interface via the following URL:

<https://egov.maryland.gov/mva/dbm>

Using your credentials, click on Login and proceed with entering your username and password to access the application.

MDOT MVA Driver Record Batch Monitoring

Welcome

Welcome to the MDOT MVA Driver Batch Monitoring Program.

The Driver Batch Monitoring (DBM) User Interface is a secure method allowing customers to enroll a driver or list of drivers to be monitored and receive updates when violation information changes for those drivers. Each night, the system inspects the monitored drivers and provides results back to the customer containing either change records for the monitored driver records or the complete record depending on preferences established during enrollment. The results are sent daily, weekly, or monthly, depending on customer preferences established during enrollment.

Restriction: A person receiving personal information through this system may not disclose the personal information to any federal agent or federal agency for the purpose of federal immigration enforcement.

Please log in to begin.

Navigating the User Interface

Once logged in, the Home tab offers initial data regarding your most recent records processed, a summary of your account information, errors, initial driving records and partial and/or complete record updates and links to often used tools.

Information

The *Information* section has some useful links to help guide the user through navigation and management of the Driver Batch Monitoring User Interface.

Information

- [User Guide](#)
- [MVA Codes](#)
- [FAQ](#)
- [MVA Privacy Policy](#)

The *User Guide* link routes you to the latest version of the Driver Batch Monitoring User Guide, to allow for online viewing of the document or saving to a local device for reference.

MVA Codes will direct you to the MDOT MVA web page where all the relevant MVA codes, references in the record, are listed for reference. This includes Driver License Class Codes, Commercial Driver License Endorsements, Non-Commercial Driver License Class Codes and Restriction Codes.

FAQs are some Frequently Asked Questions about how to manage your list of monitored drivers.

MVA Privacy Policy provides the document needed to make any changes to your DPPA reasons, primary account holders or other changes related to your account.

Account Information

When establishing an account, you are assigned an account number, a company code and select the frequency and type of records you will be receiving from MDOT MVA via the Driver Batch Monitoring application. Those attributes will be displayed to a user holding the Primary Role for the account.

Account Information

Manage your users and delivery notifications.

Your Company Accounts

Account Number:

Company Code: **444M**
Record Update Type: Full Record Updates
Delivery Frequency: Alerted Weekly

Company Code: 876X
Record Update Type: Full Record Updates
Delivery Frequency: Alerted Weekly

Should you need revisions to the record type, frequency of updates or delivery, please contact the Tyler Maryland Help Desk at (888) 4MD-HELP, 410-990-1090 or mdhelp@tylertech.com and they will assist with coordinating the changes needed to your account and obtaining approvals from MDOT MVA.

If your primary role is associated with two different companies enrolled in the Driver Record Batch Monitoring program, the system will display the information associated with the current company being displayed. If you wish to view another company, simply click on the 'Change' button, and select the company you wish to view.

Driver Record Results

The most recent Driver Record Monitoring results are noted in the top section of the Home page. The system will display a summary of errors received, initial driver records provided and partial and/or complete record updates.

Errors: There may have been errors processing one of more of the records in your monitored driver list. If so, the interface will display the number of errors as a hyperlink for easy access to reviewing these errors. To view the errors received, click on the **Errors** hyperlink and the system will take you to the errors received from the latest records processed.

These errors require your attention or review:

Notes:

- Resolving a specific error hides its own Resolve button temporarily. Until a new set of initial errors are returned by MDOT MVA, the Resolve button will reappear whenever you refresh or revisit this page.
- Except for 'This driver's license number could not be found'; no harm is done if you accidentally resolve an error more than once. It will simply update the first attempt.
- Resolving 'This driver's license number could not be found' more than once will cause multiple drivers being submitted to MDOT MVA. If you make a mistake resolving this error you will need to go the ADD/MANAGE DRIVERS tab, find the new Customer Id, and press Cancel addition on the driver.

B***88422	<input type="button" value="show"/>	MDOT MVA returned an unknown error code: N COMPANY RECORD	

Errors may occur when submitting drivers for monitoring. To guide you through reasons errors are returned, please note the Description of the error provided. Tyler Maryland also provides Notes or Resolution(s) to explain appropriate actions to resolve the errors presented.

If you need assistance with an error received, please contact the Tyler Help Desk at mdhelp@tylertech.com or (888) 9MD-EGOV and explain the nature of the problem. The support staff will request information from you and will work with you to resolve the issue.

Retrieving New Complete Records:

When a driver is initially enrolled in the monitoring program, you will receive an initial complete record for the newly enrolled driver. These records are separated for ease of access and review. To access the initial driver records, click on the **initial driver records** link and the interface will direct you to a list of New Complete Records available for review.

Retrieving Partial and Complete Record Updates:

When a new Customer ID is added to the monitoring program, the Customer ID Enrollment date will be considered the 'anniversary date' for that monitored driver. The MDOT MVA, upon receipt of the new Customer ID submitted for monitoring, will return a 3-year (or complete) driving record. Subsequently, on the enrollment anniversary date of each Customer ID, the Driver's License Number(s) being monitored will cause the generation of a 3-year driving record, for those set to Yes to receive Annual Records. **NOTE:** CDL driver records must have anniversary files for the MDOT MVA monitoring program. If you mistakenly add a CDL driver without the Annual Records option, the system will correct it for you, defaulting CDL drivers to trigger an Annual Record on their enrollment anniversary date.

Likewise, each night the system inspects the monitored drivers and provides results back to the subscriber containing either change records for the monitored driver or complete records, depending on preferences established during enrollment. These results are sent daily, weekly, or monthly, depending on subscribers' preferences established during enrollment. Updates could include infractions, restrictions, PBJ notifications, or administrative actions. Those would be included in the Partial and Complete Records Updates categories.

Partial and complete record updates: You have also received updates for your current list of enrolled drivers.

Date Received	Record Description	View
10/23/2020	Initial PBJ Records File	View Drivers  View All Records
10/23/2020	Error File	View Drivers  View All Records
10/23/2020	Partial Records File	View Drivers  View All Records
10/23/2020	PBJ Complete Records File	View Drivers  View All Records
10/23/2020	Partial Records File	View Drivers  View All Records

Clicking on **View Drivers** for the specific record will display a summary level of all drivers within that update from the MDOT MVA.

Partial and complete record updates: You have also received updates for your current list of enrolled drivers.

Date Received	Record Description	View
11/03/2021	Partial Records File	View Drivers  View All Records
11/03/2021	Partial Records File	View Drivers  View All Records
11/03/2021	Partial Records File	View Drivers  View All Records
11/03/2021	Partial Records File	Hide Drivers  View All Records

Customer Id	Full Name	DOB	CDL
B***62615	Show	08/1982	No
B***79401	Show	05/1990	No
B***64037	Show	01/1968	No
B***85250	Show	03/1987	No

Managing Monitored Driver Enrollment

The DBM user interface consists of several activities which are used to manage the roster of monitored driver licenses. All activities are performed using an overnight process to process the requests. Requests may be cancelled until 6:00 PM ET to avoid processing.

- **Add New Driver:** Customer IDs submitted using the 'Add new driver' link will generate a driving record. The record will be returned to the subscriber the next business day.
- **Upload a Bulk List of Drivers:** Customer IDs submitted using a bulk method, via spreadsheet. The records will be returned to the subscriber the next business day.
- **Edit Driver:** Used when converting a driver you are currently monitoring to now be CDL or to no longer be CDL or when indicating whether you want Annual anniversary records for a non-CDL driver.
- **Delete Driver:** Customer IDs deleted using the interface will be revised to a Pending Deletion status and will be removed from monitoring for that subscriber during an overnight process.
- **Cancel Submission:** Cancels an Add, Change, or Delete submission.

A***61851	Show			03/29		11/1986		No		Active		Yes	Edit Remove No Recent Records

Adding a New Driver

Clicking on the 'Add new driver' button will present the user with the necessary fields to populate for adding a driver to the monitoring program. Once the user enters the Customer ID, driver's Date of Birth, indicates CDL Yes/No and whether to trigger an anniversary file they will press Save to add the driver for monitoring. **NOTE:** CDL driver records must have anniversary files for the MDOT MVA monitoring program. If you mistakenly add a CDL driver without the Annual Records option, the system will correct it for you, defaulting CDL drivers to trigger an Annual Record on their enrollment anniversary date. The status of the driver will then appear as 'Pending Addition' until the overnight process runs, and they are added to the monitoring program. If a mistake is made in data entry or the subscribers change their mind about monitoring the driver, 'Cancel addition' can be clicked on to cancel the submission of the driver for monitoring.

Import Drivers

If you have several drivers you need to add, change, or delete, you have the option of importing them from an Excel workbook.

Directions

1. If this is your first time and don't have any drivers, download and fill out this sample workbook.
If you are currently monitoring drivers, download and fill out this sample workbook.

The 1st three rows contain examples. Use them as a guide for entering your own values.

2. Select the workbook you saved in the previous step.

No file chosen

3. Press Upload Now to begin importing your workbook.

Notes

Editing Driver Information

Per MDOT MVA policy, the only fields that can be modified for an actively monitored driver are the CDL indicator and Annual Records. To do so, you would Search for the driver's license you need to modify using the Search function at the top of the page, enter the Customer ID and hit Search.

The screenshot shows the MDOT MVA Driver Record Batch Monitoring interface. The header includes the MDOT logo and the title "MDOT MVA Driver Record Batch Monitoring". The navigation bar has three tabs: "HOME", "ADD/MANAGE DRIVERS", and "VIEW RECORDS BY DATE". Below the navigation bar, there is a search bar with the placeholder text "Search Driver Name or License Number" and a "Search" button. To the right of the search bar, it says "You are currently viewing company code: 001A" with a "Change" button. Below the search bar, there is a "Records per page:" dropdown set to "25" and buttons for "Excel", "CSV", and "Print". There is also an "Add new driver" button. A message states: "* Full Name may not be available until MDOT MVA provides a name for the driver." Below this message is a table with the following columns: Customer Id, Full Name *, Enrollment Anniversary, Date of Birth, CDL, Enrollment Status, Annual Records, and two buttons: Save and Cancel. The table contains one row with the following data: Customer Id: A***11111, Full Name: (empty), Enrollment Anniversary: 01/29, Date of Birth: 05/1977, CDL: No (selected), Enrollment Status: Active, Annual Records: Yes (selected), Save, and Cancel.

The results of the Search will display to the subscriber, per the below screenshot. To edit the driver information, the user will click on Edit.

The screenshot shows the MDOT MVA Driver Record Batch Monitoring interface. The header includes the MDOT logo and the title "MDOT MVA Driver Record Batch Monitoring". The navigation bar has three tabs: "HOME", "ADD/MANAGE DRIVERS", and "VIEW RECORDS BY DATE". Below the navigation bar, there is a search bar with the placeholder text "Search Driver Name or License Number" and a "Search" button. To the right of the search bar, it says "You are currently viewing company code: 491L" with a "Change" button. Below the search bar, there is a "Records per page:" dropdown set to "25" and buttons for "Excel", "CSV", and "Print". There is also an "Add new driver" button. A message states: "* Full Name may not be available until MDOT MVA provides a name for the driver." Below this message is a table with the following columns: Customer Id, Full Name *, Enrollment Anniversary, Date of Birth, CDL, Enrollment Status, Annual Records, and two buttons: Save and Cancel. The table contains one row with the following data: Customer Id: A***00004, Full Name: (empty), Enrollment Anniversary: 02/08, Date of Birth: 04/1983, CDL: Yes (selected), Enrollment Status: Active, Annual Records: Yes (selected), Save, and Cancel. The "Save" button is highlighted with a red circle.

Select the CDL No option to revise the information and then Save the record. The revision will be processed overnight for future record monitoring.

NOTE: CDL driver records must have anniversary files for the MDOT MVA monitoring program. If you mistakenly add a CDL driver without the Annual Records option, the system will correct it for you, defaulting CDL drivers to trigger an Annual Record on their enrollment anniversary date.

Editing Driver Information in Bulk

When the need arises to edit a larger number of drivers in bulk fashion, there is a utility available to upload the driver edits via spreadsheet. Navigate to the **Add/Manage Drivers** tab and click on **Upload list of drivers**.

Driver Enrollment Statuses

While pending overnight processing activities for an enrolled driver, there are several statuses to indicate actions being taken or statuses of monitored drivers. Below is a list of statuses, a description of those statuses and any action that can be taken.

Driver Status	Description	Actions
Addition in Progress	Addition of driver has been sent to MDOT MVA for monitoring.	
Change in Progress	Change to driver information has been sent to MDOT MVA for revision.	
Deletion in Progress	Deletion of driver has been sent to MDOT MVA for removal from monitoring.	
Pending change	Change to Driver CDL indicator has been changed and submitted for processing the next business evening.	Cancel change
Pending Addition	Driver has been added for monitoring and will be processed the next business evening.	Cancel addition
Pending Deletion	Driver has been submitted for deletion from monitoring and will be processed the next business evening.	Cancel deletion
Active	Driver is actively being monitored in the MDOT MVA application.	Subscriber can Remove or Edit the driver in this status

Retrieving A List of Monitored Drivers

The DBM web user interface includes a feature allowing the subscriber to retrieve a list of enrolled driver license(s). Using the Add/Manage Drivers tab, the subscriber can select to view All Records per page, then select the file type wished to download the list of drivers, whether Excel or CSV file.
